

Zerava — Zero noise. Real security.

Zerava is a lightweight cybersecurity platform designed to help startups and small teams identify and fix critical security risks before they turn into costly breaches. With a single click, Zerava scans websites, APIs, and public-facing systems and provides clear, actionable insights written in plain, founder-friendly language.

Problem Statement

Startups and small businesses are prime targets for cyberattacks but often lack the resources or expertise to secure themselves. Enterprise security tools are expensive, complex, and filled with jargon and false positives. As a result, vulnerabilities are often discovered only after an attack.

Solution

Zerava provides enterprise-grade security insights in a startup-friendly format. It scans public-facing systems, identifies critical risks, and translates them into clear business-impact explanations with actionable fixes.

Key Features

- One-click security scanning for websites and APIs
- Detection of open ports, SSL/TLS issues, security headers, and OWASP Top 10 risks
- Founder-friendly explanations with exact fix steps
- Simple 0–100 Zerava Security Score
- Weekly monitoring and smart alerts
- Compliance-ready checklist

How It Works

1. User enters a website URL or API endpoint
 2. Zerava performs an automated scan
 3. Risks are analyzed, prioritized, and scored
 4. Results are presented in plain language
 5. Actionable fixes are provided
- The entire process completes in under 60 seconds.

Security Score & Risk Analysis

Zerava generates a security score between 0 and 100. Each score maps to real business risks such as fundraising readiness, customer trust, and data exposure. Risks are categorized as Critical, Medium, or Low.

Monitoring & Alerts

Zerava performs weekly automated rescans and notifies users only when new or critical issues appear. This ensures founders stay informed without alert fatigue.

Compliance Checklist

Zerava includes a simplified compliance checklist covering HTTPS enforcement, authentication basics, data exposure risks, and basic GDPR readiness.

Target Audience

- Early-stage startups
- Solo founders and small teams
- SaaS and web-based platforms
- Non-technical founders seeking clarity
- Technical founders needing fast insights

Roadmap

- Investor-ready PDF security reports
- Team collaboration features
- Slack and webhook alerts
- AI-assisted risk explanations
- Deeper cloud and API security checks

Impact

Zerava helps startups prevent avoidable breaches, build customer trust, improve security awareness, prepare for fundraising, and make faster, smarter security decisions.
